Sarcoidosis incidence and prevalence: a nationwide register-based assessment in Sweden

Elizabeth V. Arkema, Johan Grunewald, Susanna Kullberg, Anders Eklund, Johan Askling

**Table E1.** Medications and anatomical therapeutic chemical (ATC) classification codes used to identify treated sarcoidosis patients.

	Name	Anatomical therapeutic chemical classification code
<b>Immunomodulating and immunosuppressant drugs</b>		
	Azathioprine	L04AX01
	Mycophenolate	L04AA06
	Cyclophosphamide	L01AA01
	Methotrexate	L01BA01, L04AX03
<b>Antimalarial drugs</b>		
	Hydroxychloroquine	P01BA02
<b>Glucocorticoids</b>		
	Prednisolone	H02AB06
	Betamethasone	H02AB01
	Methylprednisolone	H02AB04
	Prednisone	H02AB07

**Table E2.** Description of clinical cases from Karolinska Hospital's Sarcoidosis Clinical Register living in Sweden in 2013 (N=1070)

	Clinical Cohort	At least 1 visit in patient register	At least 2 visits in patient register	At least 2 visits in patient register and history of medication dispensing *
<b>No. (% of total)</b>	1070 (100)	1022 (96)	1013 (95)	845 (79)
<b>Male, %</b>	59.0	59.2	59.0	58.1
<b>Mean age in 2013 <math>\pm</math> SD, yrs</b>	51.2 $\pm$ 12.2	51.3 $\pm$ 12.2	51.3 $\pm$ 12.2	51.5 $\pm$ 12.3

SD standard deviation

\*Medication dispensing data available from July 2005 through December 2013
