The coronavirus disease 2019 (COVID-19) pandemic has dramatically changed the lives of people around the globe since it appeared in Wuhan, China, at the beginning of December 2019. The burden of disease and its death toll have had an unprecedented impact on the healthcare, economic and financial systems of low-, middle- and high-income countries [1–3]. Peoples' lives have been disrupted and negatively impacted by COVID-19-related suffering and lockdowns at community and household level.
