The European Respiratory Society (ERS) HERMES self-assessment course is celebrating its third year in 2020. Although it has a longer history, the course in its current format was launched in 2017 and has provided quality assessment to over 500 respiratory specialists around the world (table 1 shows a list of locations). Between 2018 and 2019, the number of courses delivered doubled and the first paediatric self-assessment course was offered in 2019. The ERS HERMES self-assessment course continues to grow in both its popularity and geographical reach.
