

CrossMark

“Variability of within-breath reactance in COPD patients and its association with dyspnoea.” Bernt B. Aarli, Peter M.A. Calverley, Robert L. Jensen, Tomas M.L. Eagan, Per S. Bakke and Jon A. Hardie. *Eur Respir J* 2015; 45: 625–634.

This article from the March 2015 issue of the *European Respiratory Journal* was published with an error in one sentence of the Methods section, in the subsection entitled “Pulmonary function tests”. Originally, the sentence erroneously stated that ΔX_{rs} was calculated as the mean R_{rs5} during inspiration minus the mean R_{rs5} during expiration averaged over the sampling period. The correct sentence reads as follows:

“In addition, we report ΔX_{rs} calculated as the mean X_{rs5} during inspiration minus the mean X_{rs5} during expiration averaged over the sampling period, a multiple-breath approach.”

The article has been corrected and republished online.
